# キーワード

Environmental- social- cultural- psychology, Experimental social sciences

## 授業の目標

This course examines the transactions between humans and physical environments from a psychological perspective. It discusses how human behavior is affected by, and affects, their natural and built surroundings. It also explores the human dimension of environmental issues.

#### 到達目標

On completion of this course, you are expected to be able to (1) recognize the transactions between humans and physical environments and explain them with reference to theories in psychology and other social sciences; (2) analyze the human dimension of environmental issues from psychological and behavioral perspectives; (3) analyze your own experience and everyday encounters regarding physical environments; and (4) understand, explain, and evaluate research studies that examine human-environment relationships.

### 授業計画

(subject to minor changes)

Lesson 1: Overview

Lesson 2: Nature and health

Lesson 3: Human-nature relationship

Lesson 4: Nature and culture

Lesson 5: Urban living and health

Lesson 6: Urban living and social behavior

Lesson 7: Urban design Lesson 8: Sense of place Lesson 9: Human agency

Lesson 10: Public understanding of climate change

Lesson 11: Pro-environmental behavior Lesson 12: Behavioral interventions

Lesson 13: Society, politics, and technology Lesson 14: (Preparation for presentation)

Lesson 15: (Presentation)

### 準備学習(予習・復習)等の内容と分量

Participants will be required to join the discussion about relevant topics during the course. Participants will be required to give a presentation at the end of the course.

#### 成績評価の基準と方法

Learning reflection on humans and natural environments (1 page, single-spaced) (4 Aug) (5 points) Learning reflection on humans and urban environments (1 page, single-spaced) (8 Aug) (5 points) Presentation (2 to 3 students in one group, 15 minutes) (9 Aug) (10 points) Total: 20 points
